## Power Pole Shade Install Guide

On the shade, separate the corner with the Duralock fastener.

Slide the open end of the shade around the Power Pole and position it so the pole is in the bent part of the cross-bracket.

Position the shade it its proper height and install the clamp that surrounds the Power Pole. Tighten the clamp so the shade is held firmly in place.

Reattach the Duralock corner.
It should require firm pressure to fully seat the fastener.
